Member of [Sigma Xi, the Scientific Research Honor Society](#).

Official nominator for the [VinFuture Prize](#).

A writer and researcher working at the intersection of physics, cosmology, philosophy, and Islamic thought, with particular focus on the nature of time. Studied physics at Aleppo University and the University of Cambridge, and the PhD from the University of Exeter in 2005. Developed the Single Monad Model of the Cosmos and Duality of Time Theory, an innovative framework that addresses foundational problems in quantum mechanics and cosmology while offering a unified metaphysical and physical account of the universe.
